Working with A&S Quality Builders

Our Company's mission is to serve our customers with high standard quality construction services, which adds value to our projects. From estimate to post construction, A&S Quality Builders Company is committed to the project. Our solutions are tailored to fit any budget and implement the most sophisticated ideas. The high quality craftsmanship is enhanced with the high ethical values of our staff and dedication to satisfy our customers.

On-Site Consultation

We listen respectfully to the desires and needs of our clients, integrating their wishes and ideas with our experience in the architectural and design fields. By using space planning, furniture placement options, traffic flow study, storage, lighting and media/communication needs, we are able to develop the best plans for our client's budget.

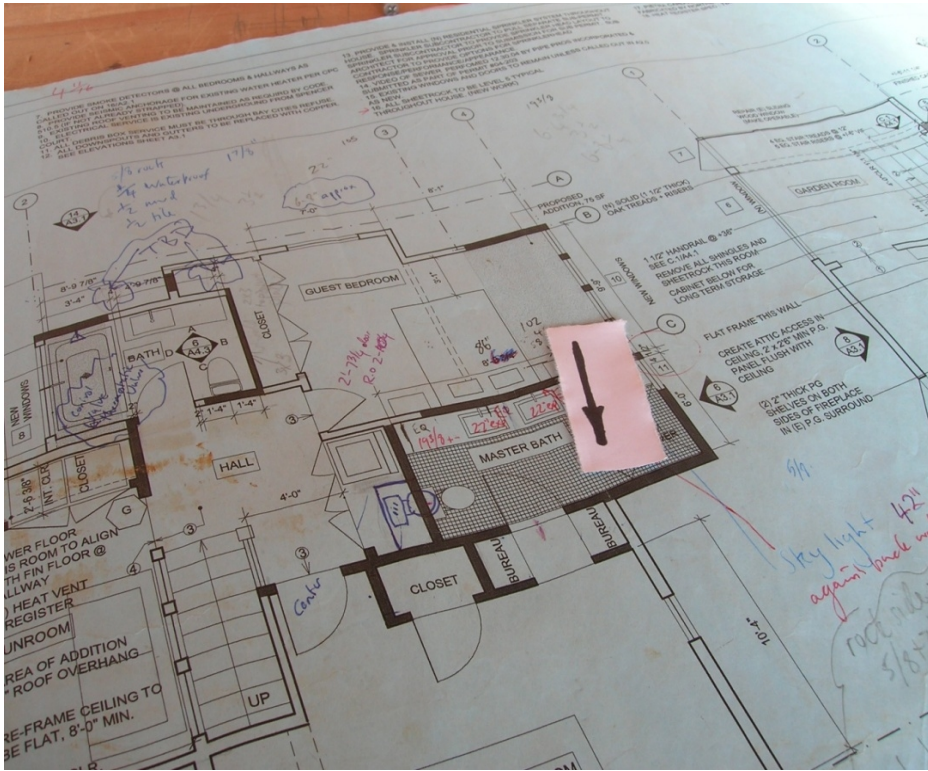

Obtain Permission by City Code

Most areas require a permit for major remodeling, additions, new buildings, swimming pools and demolition.

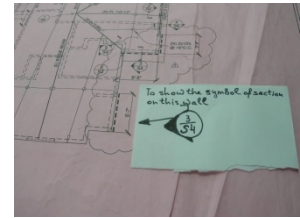

A building permit is obtained from the city or county where a construction project is going to take place and serves as permission from your city or county to proceed with the construction. We can help to obtain permission for your projects or check with your city or county to determine if your project requires a building permit.

Blueprints

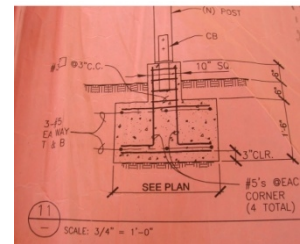

The reading of construction blueprints is a foundational skill in construction. We work with quality architects and structural engineers who are dedicated to providing excellence and care in designing your home from start to finish, from blueprints to ready to move-in house.

Bathroom Remodeling

Did you know that one of the best methods to get a quick return on your investment is to remodel your bathroom? Using a variety of materials and styles, we can help you to transform an outdated facility into a bathroom of your dreams! Plus, you will love a cut in your utility bills. Remodeling bathroom is a time when you can get creative in the designs and decorations you select.

Room Addition

Home additions are a wonderful way to generate value for your house, and the possibilities are only limited by your own vision.

If you wish to expand your house or just add additional square footage to your property we will be glad to help you.

Room additions are just as complex as building a home. Matching the **addition** to the home, while still living there, is difficult.

Everything should be the same: the site and foundation type, finishes, number and type/brand of windows, wall and insulation system, type of flooring, etc. We can help you transform your living space with the perfect home addition.

Concrete Works

A concrete works is the most difficult part of the construction job. It has to be carefully executed to ensure minimal disturbance to the surrounding area. Concrete Works can also complete the rehabilitation of your house. This work usually consists of removing damaged or deteriorated concrete. Saw cutting the concrete around the perimeter of a repair insures a professional looking job.

Interior Painting

Interior trim is important finish phase of each project. Interior painting presents a variety of textures, styles and techniques for a homeowner to choose. We are painting various surfaces, creating a textured effect, and can generate faux finishes. We always have a wide variety of options for our customers to pick from.

Any Structure

We are able to build any structure inside or outside of your home.

Stairways, retaining walls, fences, temporary structures, stone work, concrete forming, we can do it all!

Decks

Are you looking for pool decks, spa decks, decks with gazebos, high decks, low backyard decks, decks with roofs, deck benches, deck planters, cabanas, arbors, trellis, pergolas, outdoor lighting? Is a beautiful, reliable deck your dream? Call us and we will make your wish to come true. Our customers are treated with the best materials and quality service.

The process starts with a visit to your property where we discuss your needs, suggest the possible structure and demonstrate how the completed project would look like. After that we will provide you with a professional deck design and deck estimate.
